SEMINAR REPORT

An Entrepreneurship lecture on “ChatGPT”

A complete report on an Entrepreneurship lecture on “ChatGPT” organized by Shri Pragma Mahavidyalaya, for the students of all UG & PG courses to get knowledge about “ChatGPT”.

Seminar Detail:

Shri Pragma Mahavidyalaya had conducted an Entrepreneurship lecture on “ChatGPT” on 28th March, 2023.

ChatGPT, a chatbot based on a large language model, captured global attention toward the end of 2022. With its potential to generate comprehensive texts of a variety of genres based on a string of straightforward prompts, it was soon perceived as a threat by many in various fields, including – and in particular – education. Schools across the world began banning its use as instructors started to receive suspiciously well-written essays and assignments from their students.

ChatGPT, a chatbot based on a large language model, was developed by the company OpenAI and was released to the public in November 2022. It demonstrated unparalleled potential to write full texts of a variety of genres in a way a human would, based on a string of straightforward prompts. Since then, numerous authors in the media have written about the dangers of ChatGPT.

because a large language model that ChatGPT was built on was trained on hundreds of billions of words from the internet, including personal information and copyrighted material, obtained without consent or compensation. Privacy is not a concern solely from the aspect of what ChatGPT is built on, but from the aspect of the users’ input as well; for example, in March 2023, Italy temporarily banned ChatGPT because of concerns regarding the collection of data from Italian ChatGPT users. Other authors wrote of ChatGPT “causing untold chaos”, expressed concerns over its “dark side”, urging businesses to prepare for the AI takeover, and warned of the “dark risk” of large language models and the consequences for people when AI-written text becomes indistinguishable from the human-written text. Furthermore, there are those who saw the introduction of AI-powered tools as a threat to the human creative process, considering that a text or a picture can be created through the

use of a prompt rather than the laborious yet rewarding process of writing and painting. Nature's editors

(Tools such as ChatGPT..., 2023) pointed out that "ChatGPT can write presentable student essays, summarize research papers, answer questions well enough to pass medical exams and generate helpful computer code". Indeed, some authors have gone so far as to proclaim the college essay dead because of students' use of AI- powered technology to produce essays. However, other authors remained confident that ChatGPT will not significantly harm education. There are those who are optimistic that ChatGPT will change education for the better, although they find panic, which resulted in schools across the world banning ChatGPT, understandable as an initial reaction of the education sector because "teachers have been thrown into a radical new experiment". Therefore, authors call for a shift in focus – from teaching writing to developing critical reading and editing skills .

Outcome

We are thankful to all our faculties for organizing such an Informative event which is crucial for the development of our practical skills.

We got the knowledge related to ChatGPT.

We hope to get more chances further to have such an informative & wonderful experience of this seminar.

SEMINAR REPORT

Seminar on “Biodiversity Conservation Saving Our Natural Heritage”

A complete report on a Two Days Seminar organized by Shri Pragya Mahavidyalaya, for the students of all UG & PG courses to get knowledge about “Biodiversity Conservation saving our natural heritage”.

Seminar Detail:

Shri Pragya Mahavidyalaya had conducted a Two Days Seminar on " Biodiversity Conservation saving our natural heritage " on 14th September 2022.

Biodiversity conservation is crucial for preserving our natural heritage and ensuring the well-being of current and future generations. This abstract explores the significance of biodiversity, the threats it faces, and the strategies employed to conserve it. Biodiversity encompasses the variety of life forms on Earth, including species diversity, genetic diversity, and ecosystem diversity. However, human activities such as habitat destruction, pollution, overexploitation, and climate change are driving biodiversity loss at an alarming rate. Conservation efforts aim to mitigate these threats through various approaches, including protected areas, habitat restoration, sustainable resource management, and international agreements. Collaboration among governments, scientists, NGOs, and local communities is essential to effectively conserve biodiversity and safeguard the ecosystems that sustain life on our planet. This abstract emphasizes the urgency of biodiversity conservation and highlights the need for concerted global action to save our natural heritage.

Ecosystem stability: Biodiversity plays a critical role in maintaining the stability and functioning of ecosystems. Each species has a unique role to play in the ecosystem, and the loss of even one species can have a cascading effect on the entire system. For example, the extinction of bees, which are important pollinators, would lead to a significant decline in crop yields, affecting food security.

Economic benefits: Biodiversity provides significant economic benefits to communities, including the provision of food, fibre and medicine. The loss of biodiversity can have serious economic consequences for local communities that rely on natural resources for their livelihoods.

SEMINAR REPORT

Seminar on “Contribution of Hindi Litterateurs to Journalism”

A complete report on an Two Days Seminar organized by Shri Pragya Mahavidyalaya, for the students of **All UG & PG courses** to get knowledge about Contribution of Hindi litterateurs to journalism.

Seminar Detail:

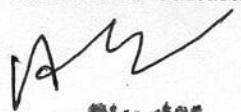

Shri Pragya Mahavidyalaya had conducted a Seminar on “Contribution of Hindi litterateurs to journalism” on 12th Jan 2022.

These authors have enriched Hindi journalism with their literary talents, providing deep, nuanced perspectives on various issues. Their contributions highlight the intersection of literature and journalism, emphasizing the importance of storytelling in understanding and addressing societal challenges.

Hindi literary authors have played a significant role in the development of Hindi journalism throughout the 20th century. Many prominent Hindi writers and poets have contributed to various Hindi newspapers and magazines, enriching the field of Hindi journalism with their literary expertise and social commentary. Some of the notable Hindi literary figures who have made significant contributions to Hindi journalism include:

Munshi Premchand: Considered one of the greatest Hindi authors, Premchand worked as a journalist for various publications, including the Zamana and Aj newspapers, and published several of his short stories and novels in these publications.

Mahadevi Varma: The renowned Hindi poet and essayist, Mahadevi Varma, contributed to various Hindi periodicals, including Chand and Saraswati, and wrote extensively on social and cultural issues.

SEMINAR REPORT

An Entrepreneurship Lecture on “Web Technology”

A complete report on an Two Days Seminar organized by Shri Pragya Mahavidyalaya, for the students of all UG & PG students to get knowledge about “Web Technology”.

Seminar Detail:

Shri Pragya Mahavidyalaya had conducted Entrepreneurship a lecture on “web technology” on 3rd march 2022.

Web Technology refers to the various tools and techniques that are utilized in the process of communication between different types of devices over the Internet. A web browser is used to access web pages. Web browsers can be defined as programs that display text, data, pictures, animation, and video on the Internet. Hyperlinked resources on the World Wide Web can be accessed using software interfaces provided by Web browsers.

This abstract provides an overview of web technology, encompassing the tools, standards, and protocols that underpin the World Wide Web. Web technology facilitates the creation, delivery, and consumption of content and services over the internet, enabling a wide range of applications and experiences. The abstract explores key components of web technology, including HTML (Hypertext Markup Language), CSS (Cascading Style Sheets), and JavaScript, which are fundamental building blocks for creating web pages and applications. It also discusses server-side technologies such as PHP, Python, and Node.js, which enable dynamic content generation and interaction with databases. Moreover, the abstract examines web standards and protocols such as HTTP (Hypertext Transfer Protocol), HTTPS (HTTP Secure), and REST (Representational State Transfer), which govern communication between web servers and clients. Additionally, it highlights emerging trends and technologies shaping the future of the web, such as responsive design, progressive web apps, and WebAssembly. By understanding the principles and practices of web technology, developers and businesses can create engaging, accessible, and secure web experiences that meet the evolving needs of users in the digital age.

Email : info@pragyacollege.com, Website : www.pragyacollege.com

Ph. : 091-1462-230101, 9587888125, 126

The main purpose of the study is to understand the very basics of web designing and knowing the components of a web page. It deals with the basic study of HTML (Hyper Text markup Language), CSS (Cascade Style Sheets), SQL and PHP. In the latest trends Web Designing is the very rapidly developing field in present market and has attracted many new developers. The report covers DOM (Document Object Model) to use HTML and embedding CSS style sheets to it. It also covers the usage of SQL and PHP for event handling and making the website pages look more attractive. In the future, Web Designing will be playing a more vital role as Internet is being used for marketing, banking, examining, almost everything.

Outcome

We are thankful to all our faculties for organizing such an Informative event which is crucial for the development of our practical skills.

We got the knowledge related to Web Technology.
